

RED HAT IS ALL IN ON OPENSTACK

OPEN SOURCE IS NOT JUST WHAT WE DO. IT IS HOW WE DO WHAT WE DO.

For the past 20 years, the Red Hat® open source software development model has produced high-performance, cost effective solutions. Our model mirrors the highly interconnected world we live in and takes advantage of the ability to share ideas and information worldwide, in seconds. It allows our customers to enjoy the highest levels of technology innovation while remaining aligned with real-world business requirements.

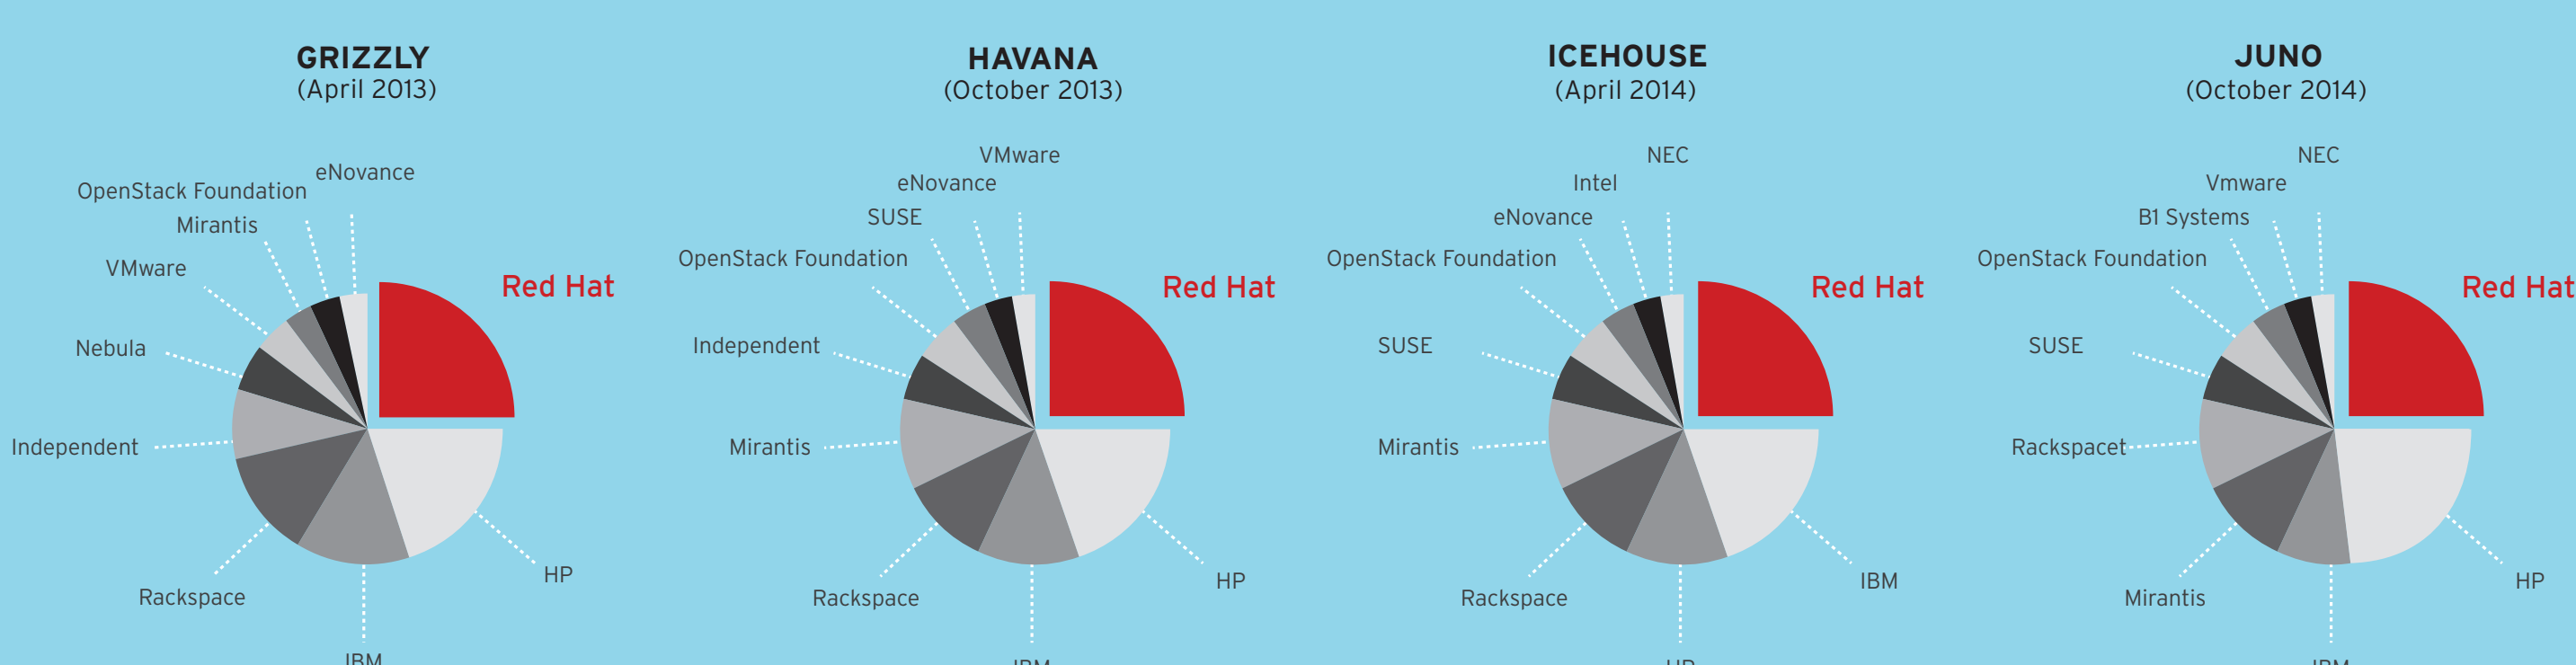

PARTICIPATE

INVOLVEMENT MATTERS IN OPEN SOURCE

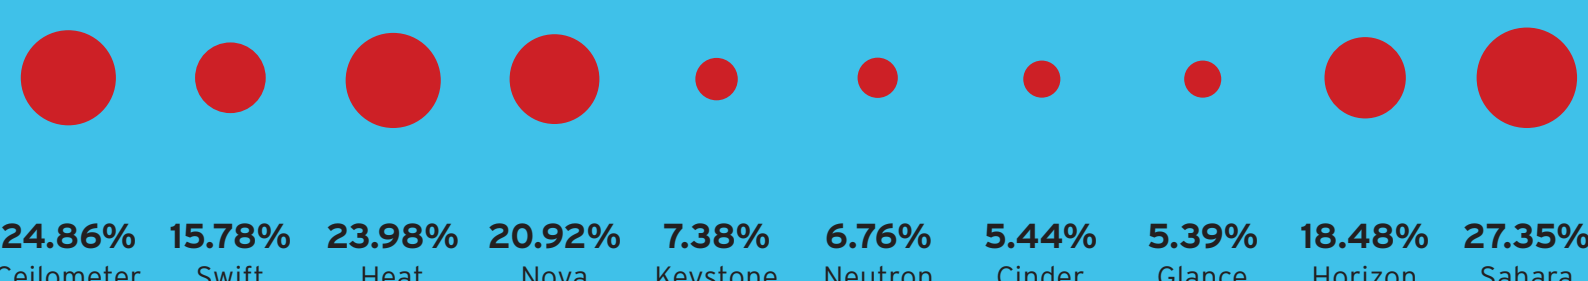

The power of the open source development model comes when many participate. At Red Hat, we live our mission to be the catalyst in communities of contributors, customers, and partners. We are a proud contributor to all aspects of OpenStack®.

"The goal of OpenStack is to bring to market scalable cloud solutions that are feature-rich, yet easy to implement. The more attention competitors bring to OpenStack helps...[reinforce] the significance of open source."

- Jim Whitehurst, CEO, Red Hat

STABILIZE

STAY UP TO DATE WITH RDO

RDO makes it easy to install and deploy the most up-to-date OpenStack components on the industry's most trusted Linux® platform, Red Hat Enterprise Linux, and its derivatives. By exposing an early version to hundreds of thousands of users, the RDO community makes Red Hat's distribution of OpenStack even better. ► openstack.redhat.com

OPENSTACK, MEET ENTERPRISE

A decade ago, it was open source against the world. Now, open technology and Linux are the foundation of the datacenter. Today, Red Hat is building an open, enterprise-ready foundation for cloud with the world's largest ecosystem for commercially supported OpenStack deployments.

BUILDING THE FUTURE TOGETHER

Red Hat made Linux enterprise ready. OpenStack is next. ► redhat.com/openstack
